**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Examination of this application reveals that it appears to be drawn to numerous different, distinct, and independent inventions. Because the claims are cast in such form (as discussed above) and set forth so many possible additive products and compositions containing said products, it is impossible to list all of the different, distinct, and independent inventions present. Accordingly, at this time, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to an additive composition or combustible fuel, classified in class 44, subclass 302.
- II. Claim 29, drawn to a method of determining the suitability of a composition as a useful additive to a combustible fuel to improve combustion, classified in class 44, subclass 903.

The inventions are distinct, each from the other because of the following reasons: Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, i.e., claims 1-28 are directed to a composition comprising a combination of specific additives whereas claim 29 is directed to a method of determining the suitability of a composition as a useful additive to a combustible fuel and is not limited to the additive(s) of claims 1-28.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

If applicant elects claims 1-28, then further restriction and/or election may be required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry D. Johnson whose telephone number is (571) 272-1448. The examiner can normally be reached on 6:00-3:30, M-F, alternate Fridays off.
